I have not received any feedback , you may go ahead with what you are proposing

Incentive working however should be parameterized i.e. we should be able to decide when to deduct & when not to deduct

eg I may decide not to deduct TDS in Q1 incentive payout but may want to deduct in Q3 Incentive payout, system should allow flexibility

With-in this , we do not want any further parameterization , i.e. we do not require system to deduct for some divisions and not for others etc

Regards,

Milind
